

Independent Minds EDU - One Page Record

Date: 2026-07-12 | Domain: <https://www.independentmindsedu.org>

Frontend React + TS + Vite	Backend Supabase Edge/Auth	Hosting Vercel + Cloudflare	Status Operational
Mission - Family-first learning platform for planning, tracking, and support. - Combines parent workflows, progress reporting, and AI tutoring.		Major Delivery Completed - Removed legacy Lovable dependencies from core flows. - Hardened Google OAuth callback for code and hash-token patterns. - Improved canonical host behavior to reduce apex/www auth mismatch. - Standardized sender branding to Independent Minds EDU.	
Current Operational Notes - Primary domain publicly reachable. - Google OAuth depends on strict Google + Supabase dashboard alignment. - Cloudflare/WAF can affect some scripted checks.		Pre-Paid Launch Checklist - Integrate Stripe billing, checkout, webhook processing, entitlements. - Implement trialing/active/past_due/canceled lifecycle logic. - Add customer billing portal and admin revenue visibility. - Finalize commercial legal documents and support operations.	
30-Day Execution Plan - Week 1: Lock OAuth reliability, observability, and provider configuration validation. - Week 2: Ship billing core with webhook idempotency and audit logs. - Week 3: Add account/billing UX and entitlement enforcement across product surfaces. - Week 4: Launch QA, support playbooks, pilot onboarding for paying users.			

Prepared as executive one-page project record for client and stakeholder communication.
